

PAPERPAK™

Hex Honeycomb Paper Roll

Introducing our lightweight & versatile Hex Honeycomb Paper Roll, new to the PaperPak range.

The Hex Honeycomb Paper Roll is the responsible solution for protecting fragile and delicate items during shipping, moving, or storage. This paper is both recyclable and compostable. The paper roll provides an environmentally sustainable alternative to plastic-based protective packaging and is lightweight and easy to handle, wrap and store.

Recyclable

Compostable

BENEFITS:

- No Need for Tape or Scissors: The interlocking honeycomb structure allows for easy wrapping, reducing packing time and eliminating the need for additional materials like tape or cutting tools.
- Cost-Effective Solution: The efficient design not only reduces material waste but also minimises packing time, cutting down on operational costs for businesses.
- Enhanced Unboxing Experience: Offers a clean and aesthetic look that enhances the unboxing experience for your customers, while also showcasing your brand's commitment to sustainability.
- Minimal Environmental Impact: Unlike plastic wraps and fillers that contribute to pollution, this paper can be recycled or composted, offering an end-of-life solution that further reduces its environmental footprint.
- Compliance with Single Use Plastic (SUPP) Regulations: As Hex Honeycomb Paper is made from an uncoated paper, this product complies with SUPP regulations.
